EDUCATION

Western Governors University | Remote

Expected Graduation: December 2026

Bachelor of Science in Software Engineering, GPA: 4.0

- National Society of Leadership and Success (NSLS) Inductee; completed formal leadership training.

Kennebec Valley Community College | Fairfield, Maine

Graduation: May 2019

Associate of Applied Science in Applied Electronics and Computer Science, GPA: 3.6, Graduated with Honors

PROFESSIONAL EXPERIENCE

Systems Engineering, Portland, Maine

October 2024 – Present

NOC Engineer I (Core Tier 3 / Site Reliability Engineer)

- Direct engineering operations, script automation deployment, and advanced Tier 3 break/fix response across an enterprise MSP footprint managing 253 multi-sector client accounts.
- Design and validate automated SSL certificate renewal pipelines using Win-Acme and Let's Encrypt across diverse global DNS providers including Azure DNS, Cloudflare, and GoDaddy.
- Resolve business-critical P1/P2 infrastructure emergencies, constructing custom emergency data recovery channels (Cove) and commanding technical war rooms with cross-functional Subject Matter Experts (SMEs).
- Appointed to the corporate AI Task Force; provided engineering direction for emerging technology integration and designed a Knowledge Base (KB) bot prototype to accelerate team queue closures.
- Isolated an undocumented multi-server CPU consumption defect within Liongard monitoring tools through proactive metric analysis, driving corporate-wide rollbacks before client platform degradation occurred.
- Selected as NOC Core Representative for the 2026 Internship Program; mentored incoming technical talent, yielding a 75% full-time hire conversion rate.
- Remediated complex infrastructure anomalies including multi-tenant GCC High AvePoint restorations, corporate Zix mail-flow migrations, vCenter cluster renewals, and batch-scripted Citrix environment fixes.

Systems Engineering, Portland, Maine

February 2024 – October 2024

Network Administrator II (Cloud Security Task Force Lead)

- Managed technical escalation queues and complex network migrations for enterprise accounts, including defense contractors scaling to thousands of end-user nodes.
- Led a 3-member Cloud Security Task Force; executed multi-tenant audits, enforced regulatory compliance, and fully trained an internal successor prior to promotion.
- Standardized corporate-wide client network baselines by building and deploying systematic monthly audit verification frameworks.

Systems Engineering, Portland, Maine

September 2022 – February 2024

Network Administrator I & Help Desk Technician II

- Administered network environment lifecycles, orchestrated hardware deployment sweeps, and optimized internal technical onboarding tracks.
- Resolved Layer 2/Layer 3 routing anomalies and complex operating system defects within strict SLA windows using ConnectWise CRM management.

Spectrum Healthcare Partners, South Portland, Maine

July 2021 – September 2022

Radiology Informatics Specialist / IT Systems Specialist II

- Maintained high-availability clinical database environments and radiology imaging configurations, supporting HIPAA-compliant workflows across North and South Spectrum facilities.
- Earned PEAK Ascent and Q4 Kineo awards for operational excellence and peer-recognized service quality.
- Trained and onboarded new hires; participated in SCRUM/Agile project delivery workflows.

Broadcast IT Technician

- Administered IT and broadcast infrastructure for two live television stations across Portland and Bangor markets.
- Engineered and coordinated organization-wide remote work transition during COVID-19, maintaining broadcast continuity without service interruption.
- Managed mobile device deployment, cabling and switch configurations, and multi-site broadcast technical support.
- Provided live event and telethon technical management, coordinating real-time systems support under broadcast production deadlines.

TECHNICAL SKILLS

Certifications: AWS Certified Cloud Practitioner, CompTIA Network+, CompTIA Project+, TestOut Network Pro, TestOut PCPro

Automation & DevOps: Win-Acme, Let's Encrypt, Infrastructure as Code, IIS, Active Directory, DNS, Intune MDM, vCenter, Windows Server, Cloud Migration

Languages & Frameworks: Java, Spring Boot, Spring Data JPA, Hibernate, Python, JavaScript, AngularJS, Bash, PowerShell, SQL, Git/GitLab, Thymeleaf

Operations Platforms: Azure Cloud, AWS Ecosystem, N-Able (N-Central, Cove Backup, SolarWinds), Liongard, ConnectWise, AvePoint, Zix

TECHNICAL PROJECTS

Full-Stack Inventory Management Application (Java & Spring Boot)

- Built a custom component-based inventory web application using Java, Spring Boot frameworks, and Maven architecture.
- Configured persistent database storage via JPA/Hibernate and formulated dynamic input validation parameters.
- Wrote automated unit tests to enforce strict inventory threshold compliance and ensure clean, optimized code architecture.

SSL Certificate Automation Proof-of-Concept Lab (Azure & Win-Acme) — Active POC, Systems Engineering

- Designed and deployed an isolated enterprise cloud sandbox environment featuring Windows Server VMs, Active Directory, DNS, and IIS roles.
- Engineered and validated an end-to-end SSL renewal architecture using Win-Acme and Let's Encrypt; demonstrated successfully across Azure DNS and Cloudflare DNS providers.

HONORS, AWARDS & COMMUNITY INVOLVEMENT

- Peer-Nominated: Outstanding Employee Owner of the Year (2025) – Systems Engineering
- Recipient: Systems Engineering Corporate Shooting Star Award
- Recipient: Spectrum Healthcare Partners PEAK Ascent Award & Q4 Kineo Award
- Volunteer Mentor: Junior Achievement Titan Challenge 2026 (High School STEM / Business Guidance)
